LOCAL CONTRACTOR PULLS SWITCH FOR GREEN POWER

NEAR BARRIE, ONTARIO:

We are pleased to announce that on Monday February 8, 2010, Solar Wind Electric Inc., a local ESA/ECRA licensed Electrical Contractor, was successful in commissioning one of the first Feed-In-Tariff projects in the province of Ontario. President and Master Electrician, Chris Olthuis, pulled the switch to connect the Hydro One revenue meter to a 10 kW Solar PV system installed on the roof of a local farmer's outbuilding.

~ MORE ~

Under Ontario's Green Energy Act, homeowners, farmers, small and large businesses can get paid for green energy produced on their properties which may qualify for the Feed In Tariff Programs offered by the Ontario Power Authority (OPA). For more information on the Feed In Tariff program go to www.fitontario.ca for links to the OPA Website

SOLAR WIND ELECTRIC INC. is a well established privately owned ESA/ECRA Licensed Electrical Contractor specializing in Renewable Energy Systems design, procurement, installation and management, and services the Central Ontario Region from the GTA through to Sudbury/North Bay for both On Grid and Off Grid power systems.
